

Madrid in Detail

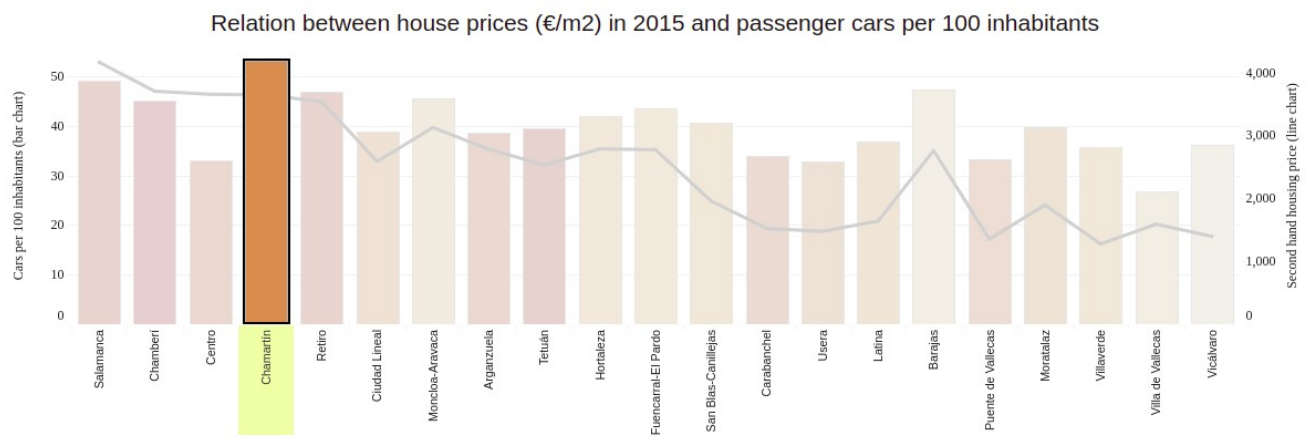

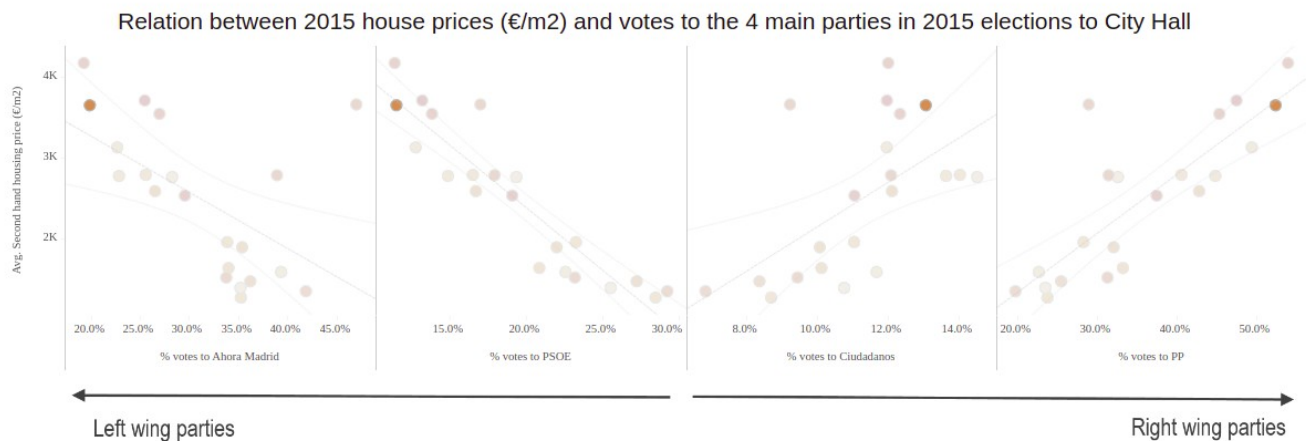

City of Madrid is divided in 21 district and 128 neighborhoods.

From the dashboard below the map of Madrid I checked districts in drop down menu.

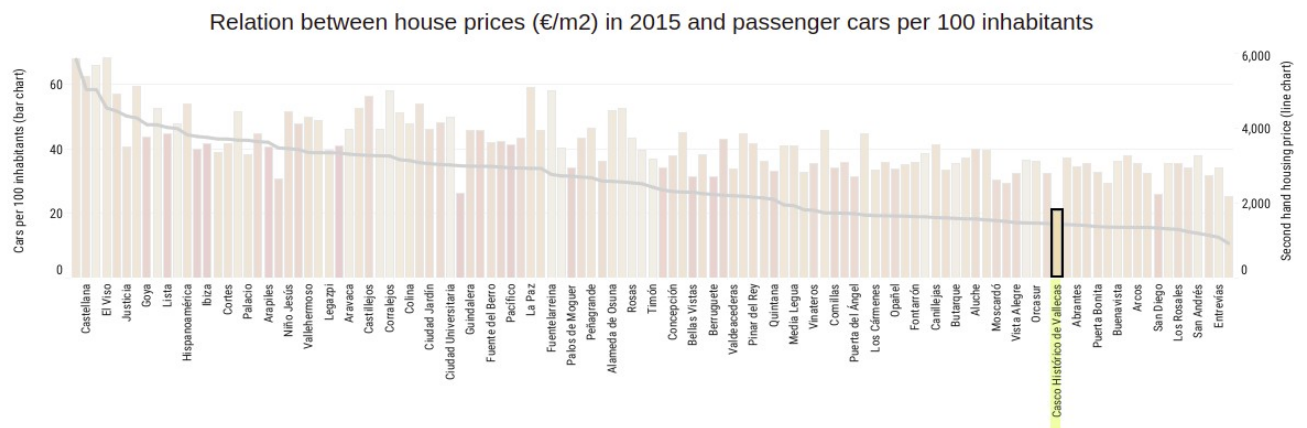

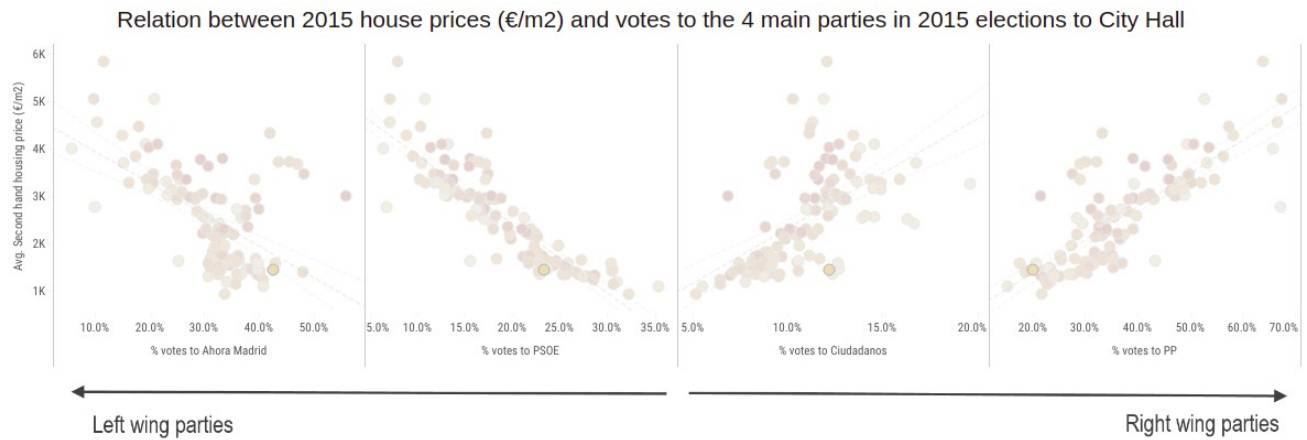

I can see on diagram that the district with the lowest life standard (lowest house price and lowest number of car per inhabitants) is *Villa de Vallecas*. When I click that specific bar I can notice political attitude of people living there. Also their geographical position on the map of Madrid is highlighted. Politically people here are Left wing parties orientated.

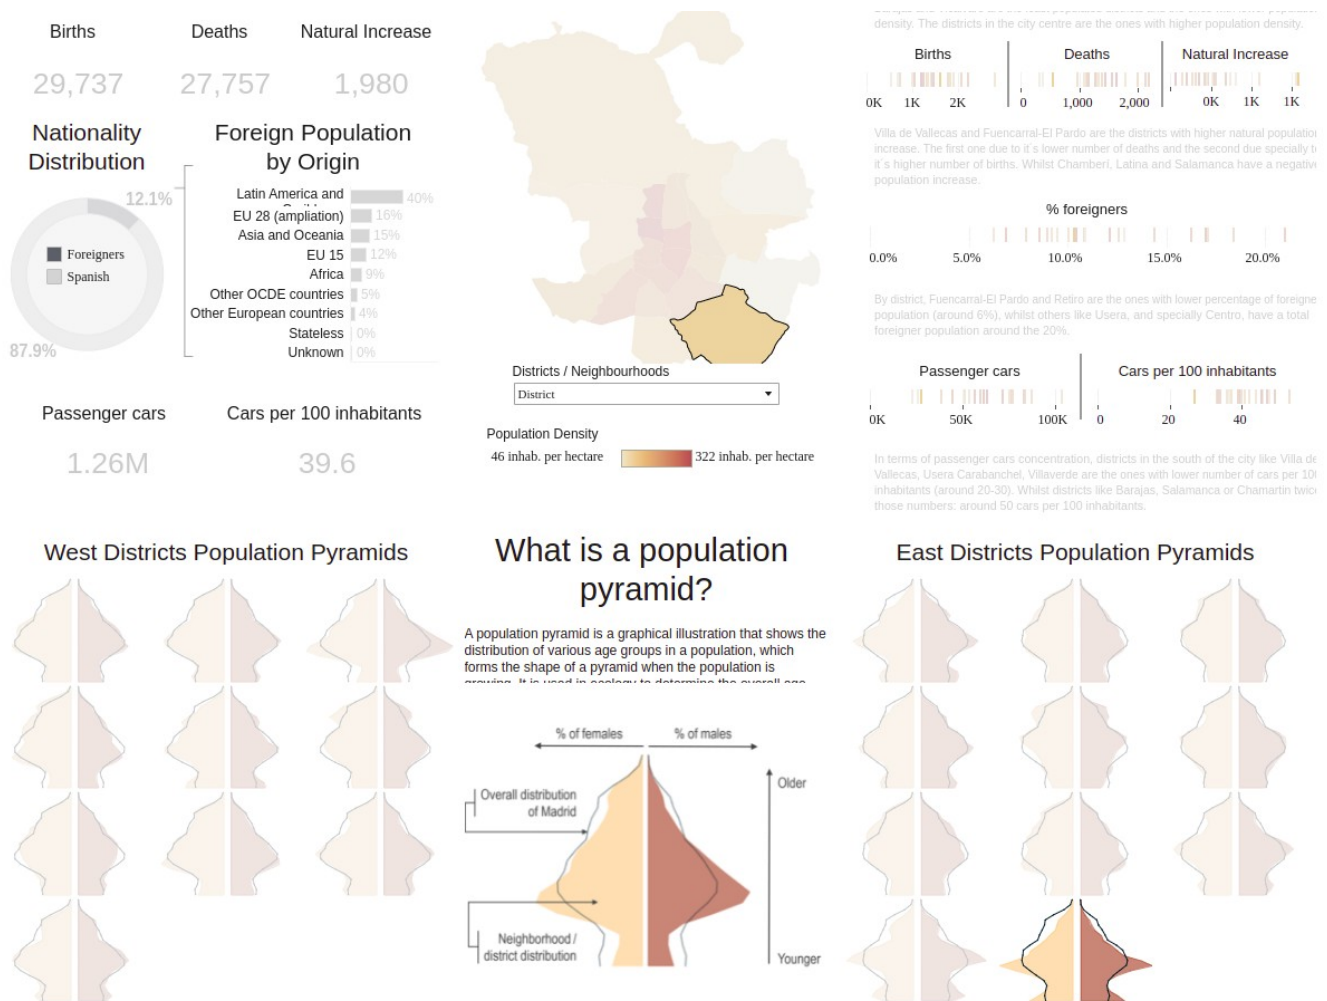

The district with the highest standard is Chamartin. When I click on that bar information gets highlighted in the diagram above . Politically people here are very Right wing party orientated (oppositely to Villa de Vallecas district)

Now, on dropdown menu I can choose Neighborhoods to examine. Casco Historico de Vallecas is Neighborhood with the lowest standard. When bar is clicked, information is highlighted. Politically people here are Left wing parties oriented.

Geographically they belong to Villa de Vallecas district.
This information is highlighted in the map of Madrid above.

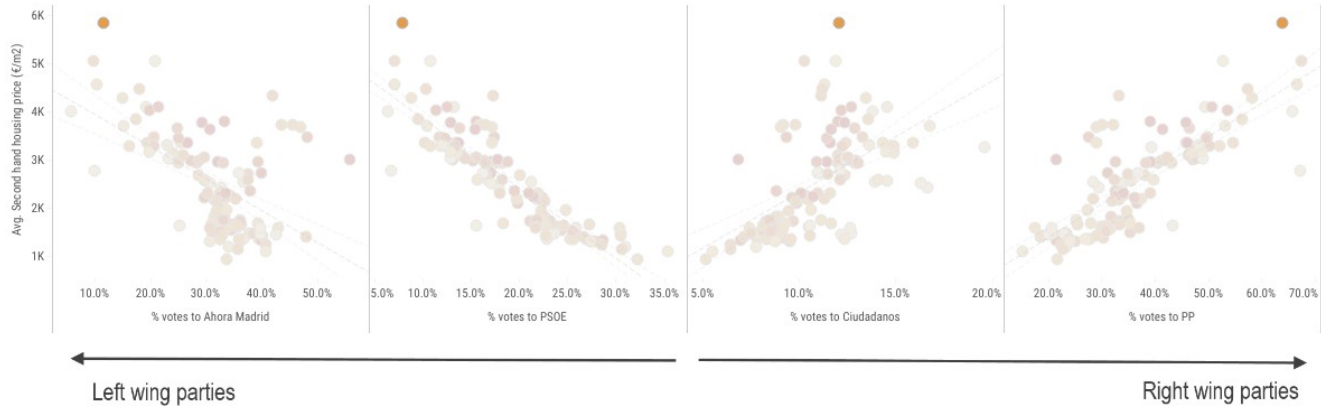

Neighborhood with the highest standard is Recoletos-the tallest bar on the diagram.

Politically people here are right wing oriented.

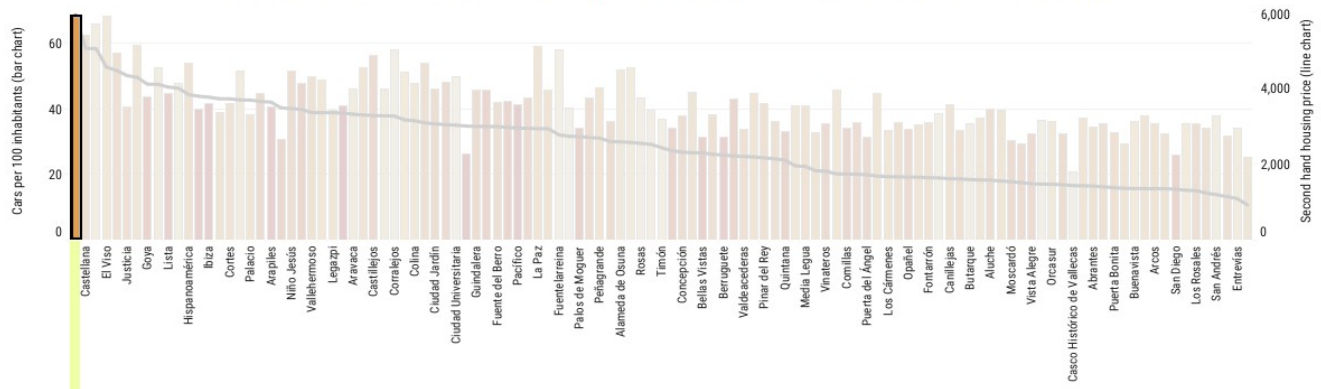

Geographically this neighborhood belongs to Salamanca district which is second highest standard district.

Chamartin district is north of Salamanca as we can check clicking on Madrid map.

Relation between 2015 house prices (€/m2) and votes to the 4 main parties in 2015 elections to City Hall

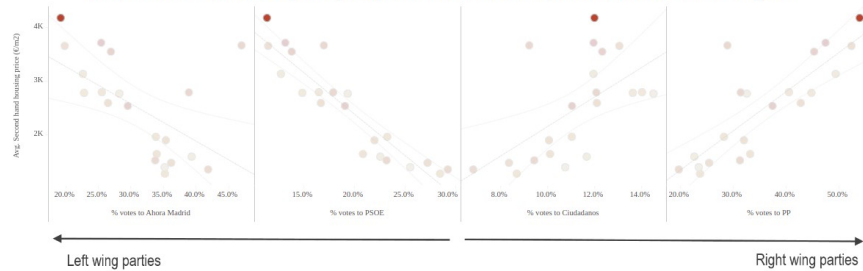

Relation between house prices (€/m2) in 2015 and passenger cars per 100 inhabitants

Salamanca district is also right wing oriented politically.

Relation between 2015 house prices (€/m2) and votes to the 4 main parties in 2015 elections to City Hall

Relation between house prices (€/m2) in 2015 and passenger cars per 100 inhabitants
